

Luxury Bathroom Fittings

April 2011

PATERSON, with more than fifty years experience, is proud to offer products that have one simple, common thread, they represent excellence in design and functionality.

PATERSON simply brings you the best – **GROHE**.

For over seventy years **GROHE** has been manufacturing superior quality tapware and flushing cisterns. Acknowledged internationally for reliability, durability and performance **GROHE** is Germany's premier sanitary fittings brand and a world-leader in the bathroom market.

Perfect water flow, always

See, touch, feel and experience the perfect water flow.

The last seven decades has seen **GROHE** continually develop and improve unique innovative technologies allowing the perfect water flow & precision.

No one has invested as much as **GROHE** to ensure that the world can experience water at an optimum performance.

4 things that makes **GROHE** different to other manufacturers:

Long lasting quality

Striving for perfection, but not stopping there, **GROHE** has a culture of continuous improvement.

Innovative Technology

Delivering the best of the best, every time.

Design

Enduring design that has received international acclaim.

Warranty

15 year limited domestic warranty
See website for further details www.paterson.co.nz

Combine these 4 key elements and the 50 + years of local backup and expertise provided by **PATERSON, GROHE** customers enjoy perfect water flow delivered by perfect looking products.

GROHE unique features and benefits

SilkMove®

Feel the difference.

GROHE taps are known for their smooth operation, providing fingertip control of flow and temperature - no splashing or sudden temperature changes. This smoothness derives from a unique ceramic cartridge, manufactured in-house from an advanced ceramic alloy and coated with a special teflon lubricant.

As a result, **SilkMove®** technology ensures a life-time of maintenance-free comfort and reliability. The smooth handling of the lever creates effortless precision and ultimate comfort.

StarLight®

See the difference.

A dazzling chrome finish is in a class of its own thanks to **GROHE StarLight®** technology, offering a mirror-like sheen that is soil repellent and resists scratches and tarnishing, ensuring good-as-new looks for years of use.

The chrome plating process, refined over the past 70 years, creates a deep and even layer and is known as one of the best surface finishes in the world.

Whisper®

No turbulence, no water hammering.

All **GROHE** products fulfill & exceed the requirements of European noise Level I approval, the most rigid test on emission in the industry (EN 817).

The soothing sound of a gentle and continuous stream of water masterfully orchestrated by SoftAirflow aerators creates perfect peace of mind.

A special mesh made of nylon and metal incorporated into the cartridge reduces possible noise effects. The special geometry of the ceramic discs together with the optimised diameter and size of the cartridge gives you the maximum flow level at the minimum noise level.

Eurostyle

Since its launch, GROHE's Eurostyle has been an unparalleled success story. Eurostyle features a forward-leaning shape, curved lever and structured contours designed to fit in with the most dynamic architecture.

A sleek, modern look is married with unique technologies, superb quality and supreme design. What you get is a reliable and durable mixer that ticks every box.

GROHE SilkMove® is the winner

Mechanical performance test of single lever mixers 12/2007 by TÜV SÜD

Advantage 1: Ease of movement

The GROHE single-lever mixer with **GROHE SilkMove®** requires the least actuation force in the entire test. Over a longer period, its superiority increases significantly.

Advantage 2: Long-lasting quality

Even after 210,000 load changes simulating a use period of 20 years, the lever sits firmly without wobbling.

Advantage 3: Precision

In the test comparison, GROHE offers the most precise temperature control thanks to the extra-wide, comfortable operating radius. This saves water and energy.

In a large-scale, long-term test of the mechanical performance of single-lever mixers from nine leading manufacturers, TÜV SÜD confirms 12/2007: In a comparison of competitors, **GROHE SilkMove®** technology clearly leads the field. You will find **GROHE SilkMove®** technology in every GROHE single-lever mixer.

GROHE. Best value. Always.

Eurosmart

Featuring a solid metal handle and forward-leaning dynamic lines, Eurosmart is the perfect addition to all contemporary bathroom settings.

This high-quality range incorporates **GROHE SilkMove®** and **GROHE StarLight®** technologies - creating a product that not only looks the part, but offers incredible and enduring performance.

The name Eurosmart says it all: smart looks, smart technology and smart price.

Eurosmart Cosmopolitan

High-quality design at an extremely attractive price – that’s what the new “Eurosmart Cosmopolitan” range is all about. These mixers not only incorporate proven, top-of-the-line technology but also score big on versatility. The various wash basin variants, a traditional single-lever mixer or with high spout – as well as the two-hole and three-hole wash basin models all share the same modern design.

Discover the full diversity of an excellent design line - Eurosmart Cosmopolitan excels at all outlets throughout the house.

Lineare

Clean and contemporary, the Lineare range is a softer take on the stark, reduced lines of minimalism. A cylindrical body enhances the radial profiles of the lever and spout, resulting in a distinctive collection.

GROHE StarLight® technology ensures a brilliant chrome finish, while **GROHE SilkMove®** technology gives precise and smooth control of water flow and temperature.

Europlus

A classic within its sector, the timeless design of Europlus balances a contemporary aesthetic with superior ergonomics. A versatile and great value range, it brings comfort and clarity to the bathroom environment.

Finished with a parabolic detail and set at an incline of seven degrees, the lever handle features **GROHE SilkMove** technology for comfortable and precise water control.

Three signature elements bring continuity to the **GROHE** product portfolio. This visual DNA is a design language unique to **GROHE** – one that allows customers to intuitively identify quality and value at a glance.

Perfect rings can be found throughout the ranges. From the new Rainshower F-Series showers to the Nova flushing plate they bring harmony to **GROHE** designs. They give rise to the cylindrical form from which the ranges are born.

Seven degrees is the angle at which the levers of the new collections are pitched. Research has discovered that this subtle incline enhances the user experience and facilitates interaction with products.

Lozenge shapes visually interpret the **GROHE** Sensual Minimalism philosophy, humanizing the core values of minimalism with their tactile appeal.

Quadra

Featuring an ergonomically loop-shaped lever, the streamlined profile of Quadra makes a bold iconic statement. An integrated mousseur maintains the purity of its form, while the use of soft radii bring a human element to the design.

GROHE SilkMove® technology, for precise control over water temperature and flow, enhances the ergonomic design of Quadra's loop handle.

Thermostats: More Comfort, Saves Energy & Cost

Quick guide to thermostat technology

What is a thermostat?

A thermostat maintains an exact water temperature of your choosing, even when water is drawn elsewhere in the home.

How does it work?

The thermostatic mixer valve mixes the hot & cold water & reacts instantly to any changes in the supplies, ensuring the temperature is maintained.

Do I need one?

If there's more than one person in your household, then a thermostat is a must if you want a comfortable and safe shower.

What are the benefits?

The pre-set temperature is reached within a fraction of a second & remains constant so there's no risk of scalding.

Are there different types available?

Yes, **GROHE** offers many different models to suit every style of bathroom.

Thermostats: More Comfort, Saves Energy & Cost

GROHE Technologies

GROHE CoolTouch®

Safely cool.

Enhanced safety is at the heart of **GROHE CoolTouch®** technology, eliminating the risk of scalding on hot chrome surfaces.

This is especially valuable for children, who often lack an adult's sense of what's too hot to touch.

To counter this, **GROHE** showers feature an innovative "cooling channel" creating a barrier between the hot water and the outer surface so it never exceeds the temperature of the shower water.

GROHE TurboStat®

Outstanding water comfort.

With **GROHE TurboStat®**, the desired temperature is reached in a fraction of a second and maintained for the duration of your shower.

This provides convenience, comfort and safety.

GROHE has increased the sensitivity of the thermo element and restructured the internal waterways.

As a result, the new thermostats react to abrupt changes of water pressure **two** times faster than before, and are up to **nine** times more accurate in terms of temperature setting than the leading competitor's product.

Inwall Flushing Cisterns - Rapid SL

The Rapid SL system gives you the freedom to design your ultimate bathroom by providing a secure and quick method of installing wall-hung toilets. Each frame comes pre-assembled and is subject to stringent testing – WC frames are tested to hold 400kg.

Grohe Quick Fix®

Simple and safe installation for qualified installers: The faster assembly is, the easier it is.
